

Homework #1

What are the 5 resources of disaster management? What are the reasons used in total Operations under each specific category?

1. Human Resources: This involves skilled individuals like emergency responders, medical experts, and volunteers.
2. Material Resources: These encompass physical items and supplies needed for disaster response, such as medical equipment, communication devices, and shelter materials.
3. Technological Resources: These include employing technology for early warning, communication, data analysis, and disaster situation monitoring.
4. Financial Resources: Funding is essential to support relief efforts, cover operational costs, and provide aid to affected individuals and communities.
5. Informational Resources: Accurate and timely information is vital for effective disaster management, encompassing data on the disaster, affected areas, and communication channels.

What should be prepared in case the same disaster happens again? Enumerate 5 steps of action to prepare yourselves and your families if such an event happens.

1. Create an Emergency kit: Compile a well-equipped emergency kit with essentials like non-perishable food, water, medications, first aid supplies, important documents, and clothing. Regularly update the kit to maintain current contents.
2. Stay Informed: Stay update on local disaster through weather forecasts, government alerts, and news. Be aware of evacuation orders and community resources during emergencies.
3. Practice Emergency drills: Regularly drill emergency procedures with your family, including evacuations, equipment use, and communication plans.
4. Establish Community Connections: Build connections with neighbors and community organizations. Collaborate on disaster preparedness initiatives, share resources, and establish a support network that can assist each other.
5. Create an Emergency plan: Craft a family emergency plan with routes, meeting points, and communication strategies, ensuring everyone knows it.
